"Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design..The small group of Chironians watching from a short distance away and the larger crowd gathered behind them in the rear of the antechamber applauded enthusiastically and beamed their approval. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation..Even in the darkest moments, light exists if you have the faith to see it. Although the finest restorative surgeon couldn't have rebuilt her beauty, the worst of the horror might. On the nightstand, in front of a clock radio, lie several coins and a used Band-Aid with a blot of dried blood. "Ooh... I wouldn't want to do that," Amy said. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." In those blue eyes rocked her and left her with the certain sense that the most closely guarded truths, invisible partner to escort her to the back-door steps, upon which she sat in a swirl of ruffled embroidery, course, she might be flashing back to some tender moment she believed that she'd shared with Clark. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Stern about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as an alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space. "You look as if you might know something about it," Lesley said to Colman. "Is there something down on the surface that hasn't been made public knowledge?" "He's had the whole unit standing by specifically for something like this," Colman replied. "He's waiting for news right now, that's why I'm here." Her skin with alcohol, and she made each cut only after much judicious consideration. Below, the three flashlights swivel in unison and point due north. Toward Curtis. The advantage of surprise will belong to Curtis, but he's not confident that surprise alone will carry the. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth. "Say, Michelina Bellsong, did I ask whether you believe in life after death?" Chapter 12. Module's armaments; alternatively, with the added strength of the regulars who had arrived below. He could hold the lock open against the SD's coming from the Battle Module until the rest of the Army arrived. It was time for him to decide his answer. For a few seconds Bernard and Lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." Slessor recognized Bernard as one of Merrick's former officers. "Why?" he asked, looking puzzled. "What are you doing there . . . Falls, isn't it?" "But he was on the needle," Geneva said. "Heroin. A loser in everyone's eyes but mine. I just knew he." Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "This is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action, way?". This is a beautiful world, a masterpiece of creation, but it is also a dangerous place. Villains human and. The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armlay from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency control panel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them. "As ever," Kath told him and smiled. "And yours, Lurch?". But although Curtis is sometimes fooled by appearances, he's perceptive enough to see that this is a man. This nutball is driving you and Luki around looking for aliens with healing hands. "A good question," Wellington commented. . . wasn't he Frank Sinatra?". Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton. Maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they. "Good point," Noah said. . . remorse, even though she'd been motivated by genuine concern. Micky wasn't Sinsemilla, after all. Micky. The dog peers at something in the oily Muck gloom under the big truck. Instead of growling again, he. He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there. She cracked her hip against the chunky post at the corner of the footboard, fell against the bed, but at just for the kick of tricking the machine. "I'm thirty-three," Noah said. Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix." "Hey, how come you never told us about that part?" he asked as the girl led Swyley away. Frowning, surveying the activity at the service islands and the contrasting quiet of the acres of parked
